

Tributech IoT Accelerator Kit

You are planning to develop/offer a digital service based on IoT data?

We have you covered! Our Tributech IoT Accelerator Kit provides you a tool-kit for plug & play sharing of trustworthy data, including a clear and transparent way for you and your customer how the data is collected and shared. Overcome the barriers of missing trustworthiness and willingness to share with your customers and fuel your data-services with trustworthy IoT data!

Self-starter Kit

€ 5.000

- ✓ 1x IoT Device (Edge or Embedded)
- ✓ 1x Setup DataSpace Hub
- ✓ 2x Setup DataSpace Nodes
- ✓ 6 months DataSpace Kit subscription included
- ✓ Preconfigured plug & play setup
- ✓ 2x 3 hours online training

Option A: IoT Edge Kit

The **IoT Edge Kit** is the way to go if your projects wants to integrate IoT data on protocol level (e.g. OPC-UA) and higher volume data from e.g. machines on a factory shopfloor.

- ✓ Kontron Kbox A250
- ✓ Azure IoT Edge Runtime
- ✓ Tributech DataSpace Agent Edge
- ✓ Pre-installed industrial IoT sensor data simulator

Option B: IoT Embedded Kit

The **IoT Embedded Kit** is the way to go if your project wants to integrate IoT data on sensor (e.g. 4-20mA Sensors) or hardware interface level (e.g. Modbus RTU, I2C, Canbus).

- ✓ Tributech Sensor Security Module
- ✓ Pre-built Infineon IoT Sensor Kit incl. "Shield2Go" interface and sensor
- ✓ Easily extendable via 3x Mini PCIe shield slots
- ✓ Pre-installed sample project for Infineon IoT Sensor Kit
